

Datafeed Administration Online Session

What is this session about?

This session is aimed at providing Datafeed Administrators with knowledge and experience of activating and managing Datafeeds at a practice and/or XPLAN site level. This is achieved through expert knowledge, hands-on application, interactive exercises and real-business processes.

This session provides an in-depth understanding of how the XPLAN software and its Datafeed capability fit within the Advice Journey.

Who should attend this session?

- Datafeed Administrators

Time

Self-paced

Learning Outcome

After completing this session, participants will be able to:

- Map adviser codes
- Enable system datafeeds
- Report on datafeeds
- If required map clients
- If required refresh datafeeds
- Troubleshoot datafeed queries

How do I register for this session?

This training requires no registration. Training is available now through the [IRESS Insights Community](#) as self-paced learning (eLearning).

** registration is required to access the Community*
