

Iress FIX Hub

Cloud-native global market FIX connectivity

Fast information exchange. Reliable connectivity. Simple onboarding.

Iress FIX Hub is a cloud-native FIX hub that excels at the fundamentals - speed, cost, and reliability - to connect buy-side, sell-side and trading venues across global markets. Designed to deliver immediate cost and performance benefits, Iress FIX Hub dramatically reduces testing, reconciliation and deployment overheads, point-to-point connections and IT footprints across message protocols.

It's an end-to-end, fully managed service with low touch onboarding and FIX manipulation for access to global counterparties via one connectivity partner, connection and certification.

A global FIX Hub for today and tomorrow

Fast, low-touch onboarding and certification

High-performance middleware infrastructure for guaranteed delivery

Normalised and predictable FIX RoE (FIX 4.2 and FIX 4.4) compliance for fast certification

Advanced encryption and multi-layered security

High availability, multi-region system

Fully-managed, scalable cloud-native or cloud-network infrastructure
