

Iress Data Insights – Regulatory Reporting

Iress Data Insights is a cloud-native platform that gives you fast, self-service access to trading data – so you can report, analyse and act with confidence.

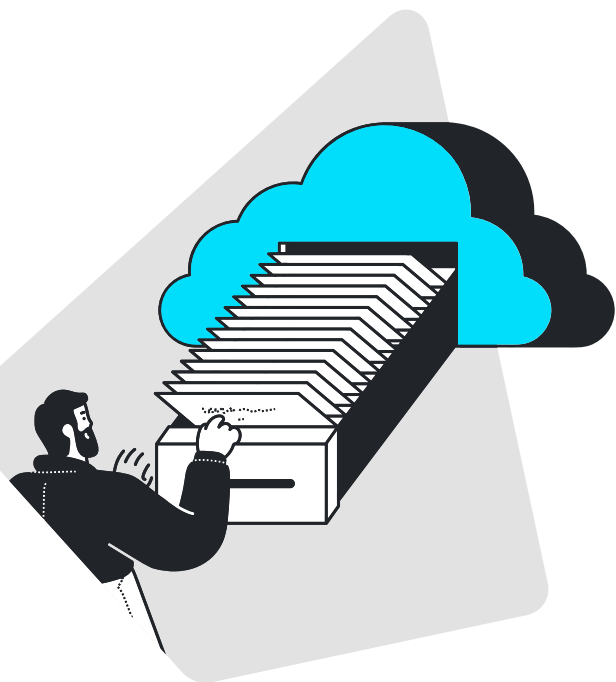

Accessible via MyIress, your interoperable, web-based platform, there's nothing to install and no need to switch screens. Just seamless access to the tools and data you need.

With powerful capabilities including Business Intelligence, Data Sharing, Alerting and Customised Dashboards, Iress Data Insights helps you unlock more value from your data.

Its latest enhancement, the **Regulatory Reporting** module, provides self-serve, centralised access to normalised audit and transaction data, enabling compliance, risk and operations teams to independently search, filter and extract data, detect potential issues early, and investigate details without leaving the Iress environment. All built on secure, scalable, cloud-native infrastructure.

Regulatory Reporting:

Key features and benefits

Connected, centralised data

Unify fragmented audit and transaction data across desks, systems and venues into a single, reliable interface, built into the Iress ecosystem to ensure integrity, accuracy and control.

Self-serve reporting

Empower teams with on-demand access to search, filter, visualise and explore normalised regulatory data, eliminating manual data manipulation and enabling high-value analysis.

Proactive compliance monitoring (Coming Soon)

Identify, investigate and resolve compliance risks with rule-based alerts, exception reporting and investigation tools. All natively embedded within the Iress ecosystem, so you can trace issues to their source without screen switching.

Built-in data protection

Safeguard sensitive data with MFA, SSO, role-based access and encryption in transit and at rest.

Scalable infrastructure

Built on cloud-native architecture that supports rapid deployment, continuous updates and unified access to trading data across systems and venues.

Why use it

Accelerate compliance

Speed up your compliance workflows by centralising your data for easier reporting, auditing, and analysis.

Reduce risk

Strengthen control and accuracy by unifying audit and transaction data, reducing fragmentation and human error, and supporting proactive compliance monitoring.

Gain confidence

With audit-ready reporting tools, you can act proactively, respond faster to regulatory inquiries and make informed, confident decisions.

Scalable for growth

Iress Data Insights is designed to scale with your needs — whether you're expanding globally or managing an evolving regulatory landscape.

Ready to streamline compliance and unlock the full potential of your data?

Sign up for Iress Data Insights today and discover a more efficient, more informed, and more compliant way of doing business.
