

ViewPoint quick start guide

Software and data for better trading
performance

Introduction

ViewPoint is scalable web-based trading and market data software offering multi-asset, multi-market trading and real-time market data.

This is our quick study guide to get you started and we also have a detailed user guide found [here](#).

Getting started

Workspaces are saved online and are accessible from any location.

The screenshot shows the ViewPoint trading interface. On the left, there are panels for currency quotes (AUDUSD.FX, AUDGBP.FX, AUDJPY.FX, AUDEUR.FX) and market status (ASX). The main area displays a table of securities for the S&P/ASX 200 index. Annotations highlight the following features:

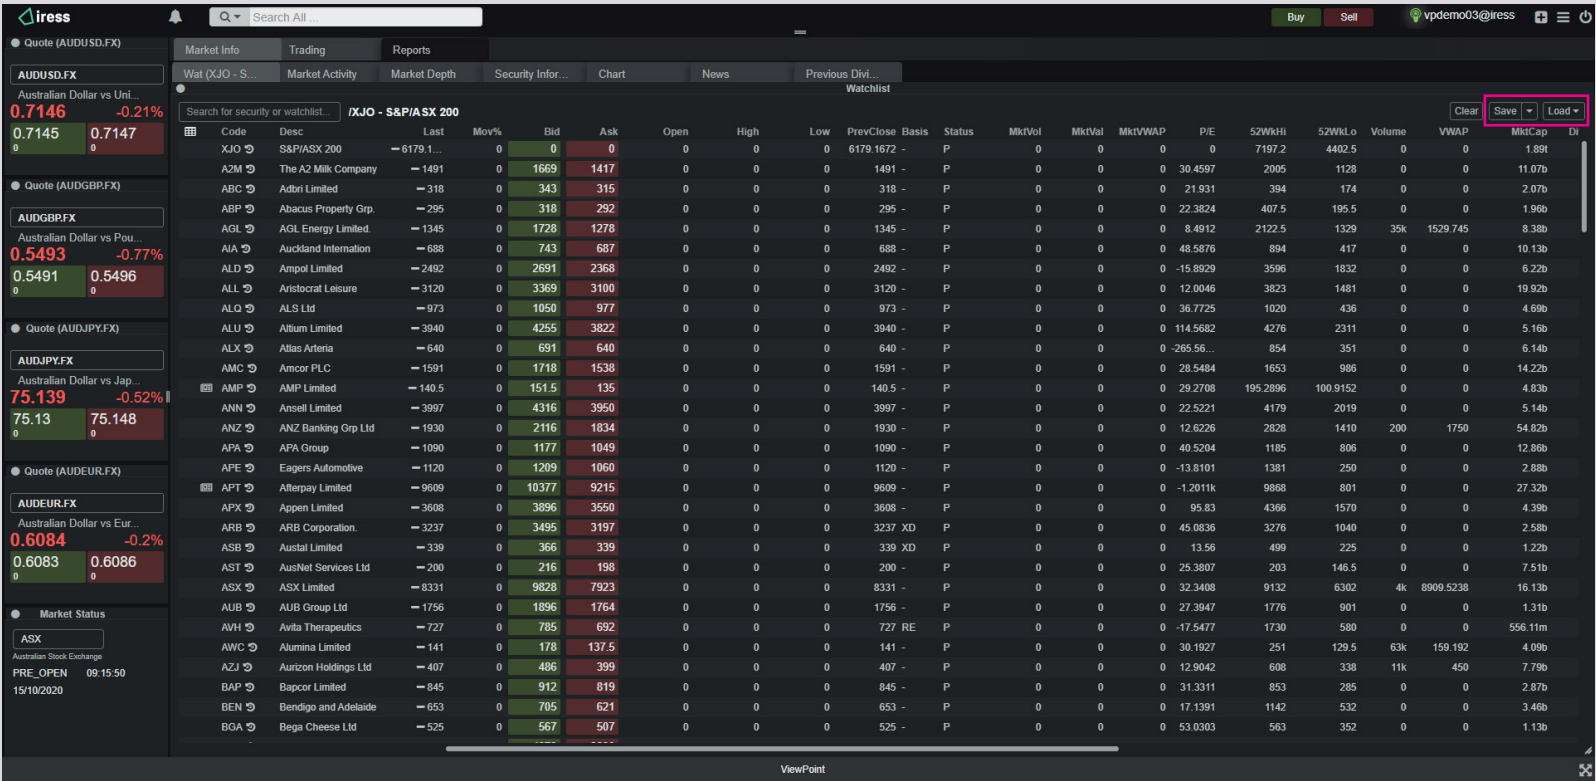

- Notification Preferences:** A bell icon in the top left corner allows users to set notification preferences to send alerts about specific quote, news, and trade conditions.
- Search Bar:** A search bar at the top center allows users to conduct a basic or category search for securities, news headlines, or widgets.
- Drag and Drop:** The interface allows users to change the position order of worksheets and the widgets in the worksheet by dragging and dropping the title of the worksheet or widget.
- Application Menu:** A menu icon in the top right corner allows users to rename their worksheet, reset their settings, set notifications, configure preferences, access the help centre, and sign in and out and change their colour scheme.

Watchlists

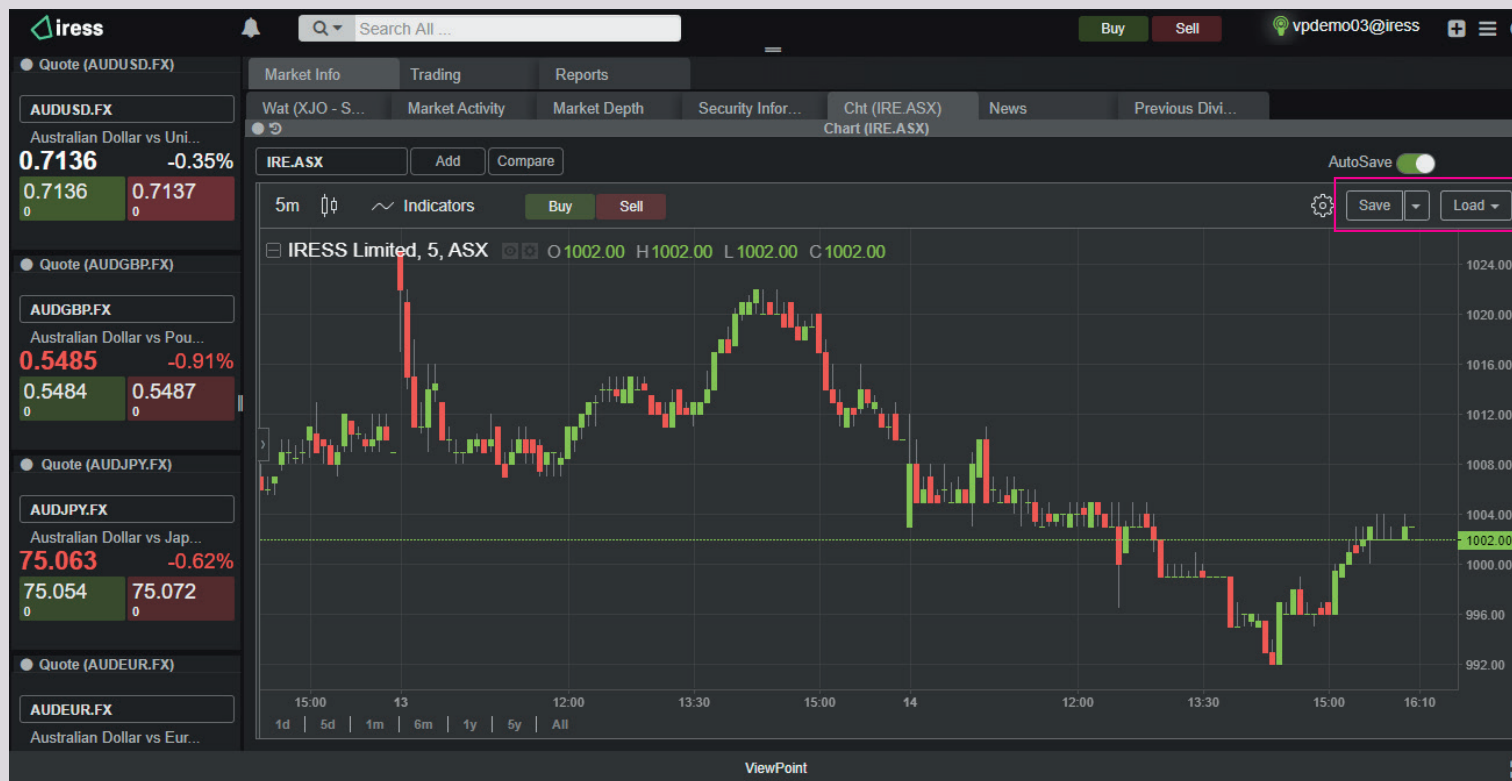

Watchlists can be created by simply typing in the security code or name of the instrument.

Clients can **save** their custom created watchlists and **load** them.

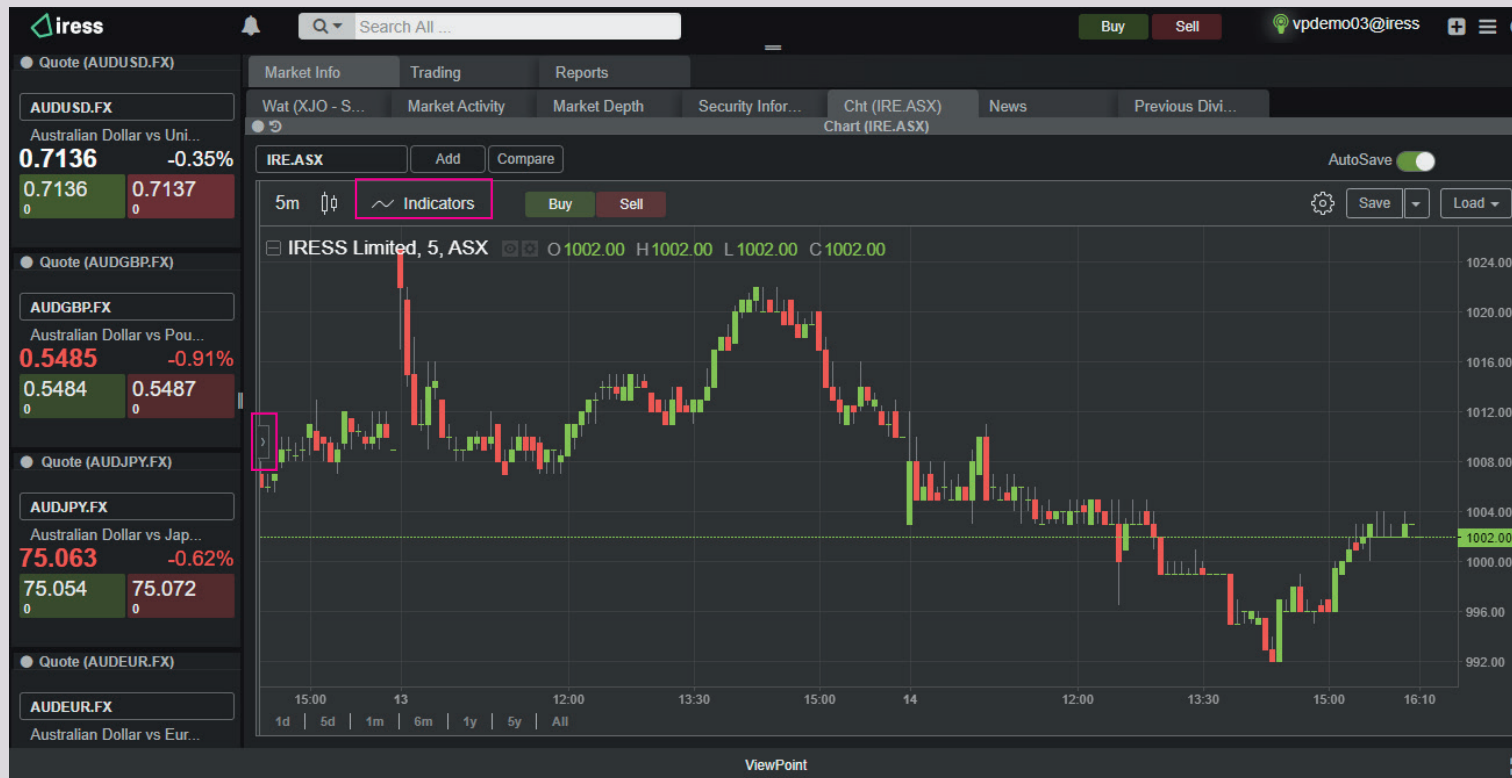

Chart

Users can create their own custom charts with indicators and drawing tools and can easily **save** and **load** them.

Chart

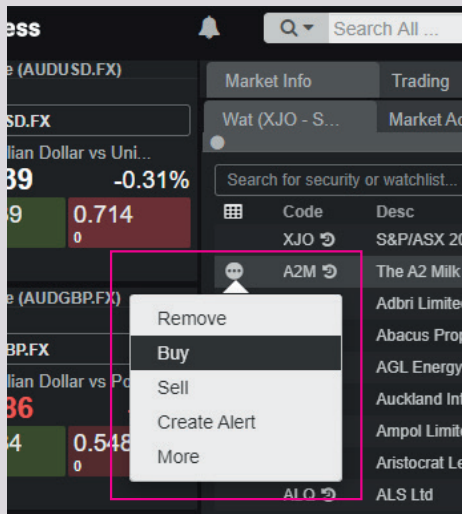

Users can include a variety of **indicators** and **drawing tools** and overlay them on the security that they have selected.

Trading

Launch the order entry ticket from multiple areas.

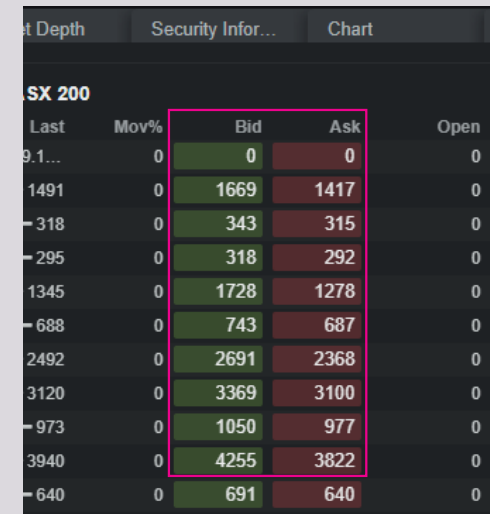

Click on the inline action menu.

Click on the buy and sell buttons.

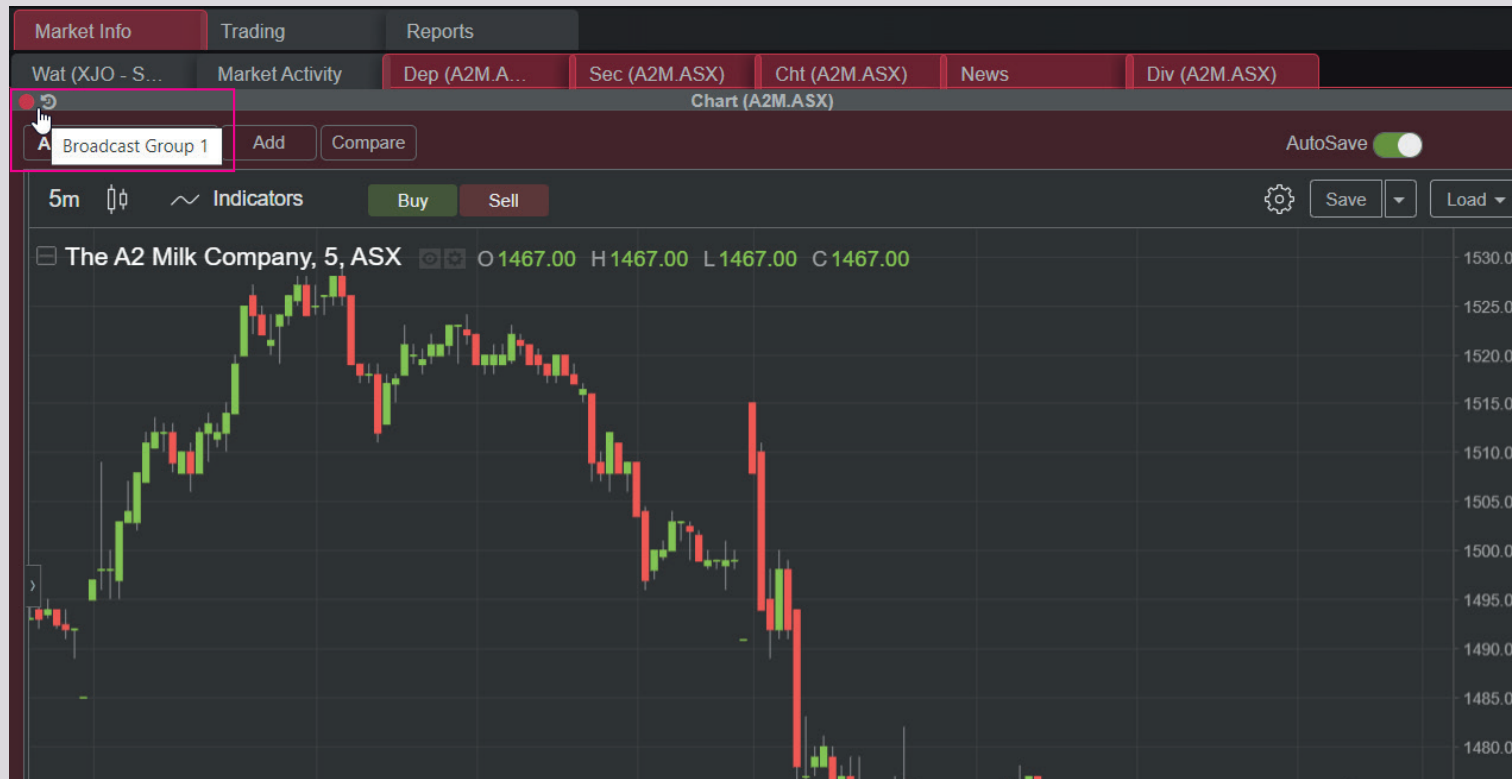

Click on the bid and ask prices.

Top tips

Using Broadcast

Broadcasting is a great feature in order to 'broadcast' a particular security of interest through all the widgets that have the same **broadcast colour**.

Help centre

The application includes an online Help Centre that provides information about the application. You can access the Help Centre in one of the following ways:

Click the **application menu**  button in the top right-hand corner of the application and select Help Centre.

Click the **widget menu**  in the top right-hand corner of a widget and select Help Centre to display help specific to that widget.

The Help Centre window has two tabs:

Contents: a table of contents. This is the default tab. **Index:** an alphabetical list of keywords.

Use the table of contents

The table of contents displays pages and books. Pages represent individual help topics, while books represent groups of related help topics.

1. Select the **contents** tab.
2. To open a book, click on the book.
The topics in the book display.
3. To view a topic, click a page. The topic displays in the right-hand pane.

Use the index

1. Select the **index** tab.
2. In the keyword box, type in the first few letters of a keyword you want to find. The index highlights the first word beginning with your letters.
3. Click the keyword you are interested in.

If there is only one topic associated with the keyword, the topic displays in the right-hand pane.

Use search

1. In the **search** bar in the top right-hand corner of the window, type a search word and press enter or click .
2. Type a search word into the box and press **enter**. A list of topics containing your search words displays below the box.
3. Click a title to display the topic in the right-hand pane.

We are a technology company providing software to the financial services industry. Since our beginning, people across financial services have trusted us to take their performance to the next level with more than 9,000 businesses and 500,000 users globally now using our software.

From the world's most iconic financial brands to entrepreneurial advice firms, challenger banks and digital disruptors, we help improve every aspect of your business so you can work better, every day.
