

SuperStream messaging for funds & employers. Efficient. Simple.

SuperConnector

iress.com/super-connector

Tell me how it will help me

Tell me what it actually does

The continual expansion of superannuation reporting obligations means super funds require better technology and automation to keep up with demands.

SuperConnector saves super funds time and money, increasing automation by facilitating message transfers in compliance with the SuperStream Data and Payment Standard, and Standard Business Reporting (SBR) standards. This means the quality of the data reaching super funds is improved, risk is reduced and data transmission is both seamless and secure.

SuperConnector is a verified SuperStream gateway that enables the transfer of messages between employers, super funds and the ATO.

Provided as a managed service, SuperConnector is a cost-effective, compliant, resilient and robust service that eliminates the need to use multiple system interfaces.

It can be used by any super fund, regardless of the registry system they are using.

Additionally, SuperConnector natively integrates with Iress' Acurity Registry. This simplifies integration and speeds up implementation times. It provides an easy adoption path for super funds looking to reduce integration points and the number of vendors they communicate with. Using SuperConnector takes the hassle out of upgrades and reduces testing and maintenance.

Can you break it down for me?

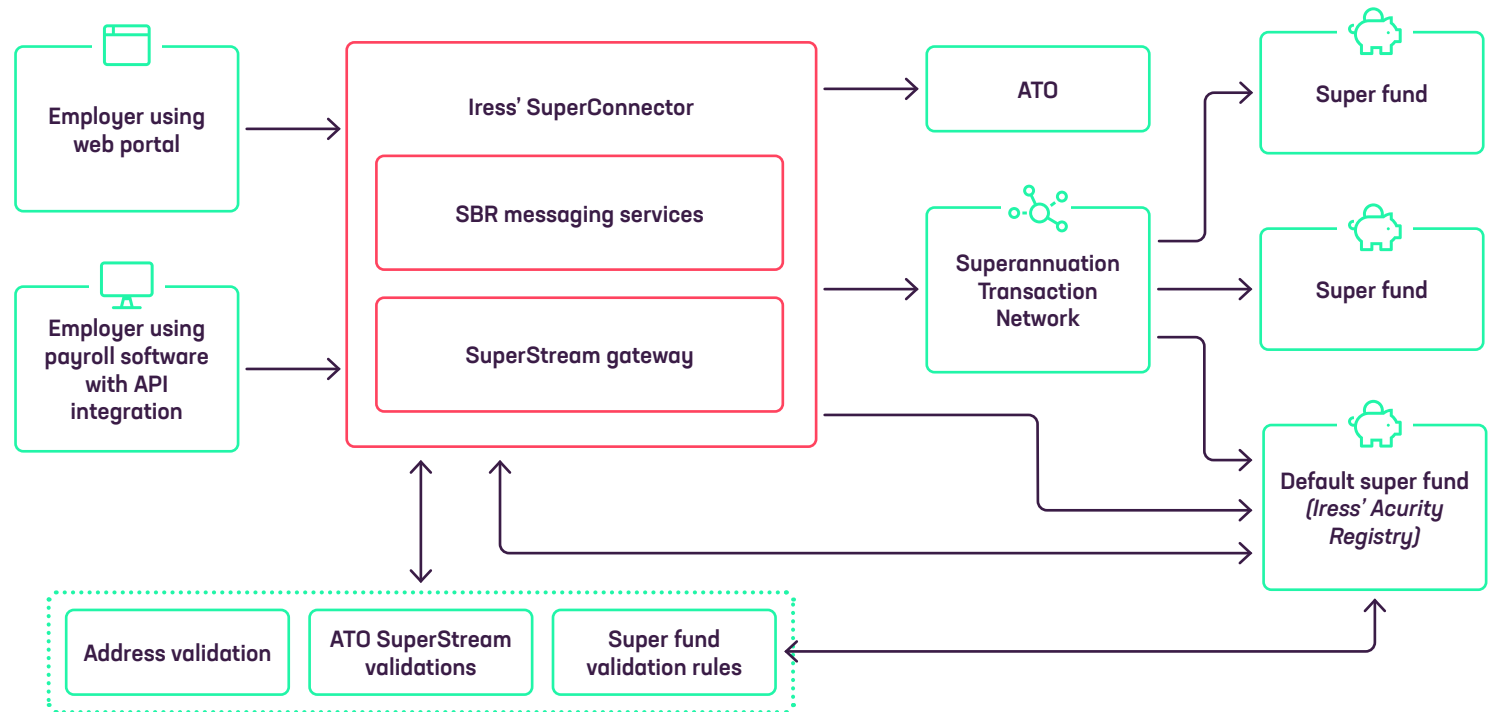

Can you draw a picture for me?

SBR message services

Provides what you need to meet your reporting obligations for MAAS and MATS.

SuperStream gateway

Provides the capability to transmit SuperStream compliant contribution and rollover messages.

Give me four reasons why I should use it

1

Comply with ever-changing regulations

Meet SuperStream and Standard Business Reporting obligations with ease.

2

Reduce risk & improve efficiencies

Streamlines your operations by eliminating the need to use multiple systems.

3

Cost-effective

Both technical and legislative updates are included as standard in your monthly subscription fee.

4

Seamless integration

Integrates with any superannuation registry system, and natively integrates with Acurity Registry for deep validation and processing efficiency.

Is there any other important information?

What about service and support?

We understand providing great service and support goes hand-in-hand with delivering great software.

We pride ourselves on our thorough and timely implementations, reliable and scalable hosting services, robust back-up and recovery procedures, and ISO/IEC certified information security management.

Our expert-led support team, training programs and online user community all help our users get the most out of our software.

How does Iress stack up as a technology partner?

Every day, more than 9,000 financial services businesses use our software to make better decisions and deliver better results. We know they don't just expect software that works, they also want a technology partner that works with them.

Leveraging our industry knowledge and global experience working with clients just like you, we design, develop and deliver creative, reliable software that does what you need it to.

At Iress, we believe technology should help people perform better every day.
